OSU Hiring Team
Oregon State University
Corvallis, OR 97331

Dear Hiring Team,

I would like to express my interest in applying for the teaching assistant position at Oregon State University. I am a recent graduate from UCSB and am currently working towards my second bachelor's degree at OSU in Computer Science. My time spent as one of the primary employee trainers at the retail Pharmacy CVS and as a college student having achieved high academic success has taught me an intractable work ethic and how to efficiently manage and prioritize my tasks while balancing many responsibilities.

My 2 years being a pharmacy technician and trainer at the pharmacy taught me to mentor in varying styles depending on the trainee as I adopted my own training style as one that followed the student. 100% of my trainees went on to succeed in the job, clearing our 90 day probation period. I was required to utilize judgment in both how to best help employees who were struggling as well as when a trainee needed more or less instruction in any particular field.

I also have maintained high grades throughout this post-back program as well as earning a 3.5 GPA when I was undergoing an incredibly taxing bachelor's program at UCSB for Biology. Throughout this program I have undergone personal side projects developing websites and small video games. This has solidified my knowledge and practical application of the content provided in classes giving me a more thorough understanding of the material than the average student.

I see this role as an opportunity to continue learning more about a subject I am passionate about while I teach, which I believe I will be both capable and competent in. I am thrilled for the chance to bring my can-do attitude and intrapersonal skills to the table. I look forward to hearing from you and would love to discuss more in a personal interview. Thank you very much for your time and consideration.

Warmest Regards,
Frandy Jay-R Viray Usi
